Jahtiradio

Your hunting party's radio on your phone

Hold the button down and talk. The whole party hears you, and your words also appear as text. No account or password needed.

1

Get the app. Point your phone's camera at the QR code and tap the link that appears. You can also search the app store for "Jahtiradio".

The app works on iPhone and Android phones.

jahtiradio.fi/lataa

2

Type your name and tap **"Continue"**.

The app asks for access to the microphone and notifications. Tap "Continue" and allow. On Android, set background use to "Unrestricted" (on Samsung under "Allow background usage") so the radio plays even with the screen locked.

3

Choose **"Join the hunt"** and type the code you get from the hunt leader.

If the hunt leader sends a link, tap it. You join the hunt without typing the code.

Today's code: _____

4

Hold down and talk. Let go when you have finished. When someone else is talking, wait for your turn.

> Try it at home: use the code **KOE 123**. The app plays back what you said.

During the hunt

Loud, Quiet	Drivers choose Loud. Hunters on a stand choose Quiet: the sound is low and the phone vibrates.
SOS	Hold the SOS button down for two seconds. Everyone gets an alert and your location. Also call 112.
No signal	Your talk waits on the phone and is sent when the signal is back. Messages sent meanwhile appear at once.
Battery	The radio turns itself off after three hours with no talk. Tap "Rejoin" to come back.
Morning	The hunt ends at 4 a.m. Finnish time, a night hunt at 12 noon at the latest. Its talk and messages are then deleted.

For the hunt leader

How to start today's hunt

The hunt leader starts today's hunt and shares the code with the party. The others join with the code or the link.

1. Install Jahtiradio, **type your name** and choose **"Do you lead hunts? Start a new hunt"**.

   Once you are a hunt leader, the button is "Start today's hunt".

2. The first time, the app asks for your hunting party's name. Type the name of your club or party.

   The party is kept for later hunts. You give the name only once.

3. Answer **"Which hunt today?"**, for example "Deer", and choose **"Start hunt"**.

   A random code is ready. You can type your own code instead.

4. Tap **"Share code"** and send the code to the party, for example on WhatsApp.

   The message has a link that takes people straight into the hunt. Anyone nearby joins at once. Anyone joining from further away needs approval from a member of the hunt.

Other hunt leaders

Open Settings › Hunting party and choose **"Invite hunt leader"**. Send the invite, for example by text message. Each invite is for one hunt leader and is valid for seven days. A party can have up to eight hunt leaders.

Good to know

Hunt state	Hunt leaders see the buttons "Start hunt" and "Leave stands". Everyone sees when the hunt starts and when it is time to leave the stands. To hide them, use Settings › Hunt state buttons.
New day	Today's hunt ends at 4 a.m. Finnish time, a night hunt at 12 noon at the latest. On the next hunting day you start a new hunt for the same party and share its code.
Guest	A guest joins with the same code and reads the messages in their own language: English, Finnish, Swedish, German, Estonian, Norwegian or Danish.
